While I am generally supportive of releasing these items, I would have liked the chance to have a briefing with OTD to determine which papers should be including in this action as there still seems to be some disconnect.

Further, with regard to “legal jurisdiction” brought up by OTD...information papers are simply that and do not require action on the part of the Department. Sending over any issues that the staff may have observed is not a matter of legal jurisdiction. The Department is objecting to being required to take action on items they deem outside of our jurisdiction. I do not believe we should be self-censoring.
