The letter seeks information we already have. During a visit to Hanford in late May 2015, Board Member Santos and I asked for the same information that this letter would have DOE provide. We inquired of the Deputy Manager of the Richland Operations (RL) Office and the federal director of the RL authorization basis team. The staff is well aware of the response provided by RL, they simply disagree with RL's position. I disagree with RL's position, too. However, I find no value in asking the same question and receiving the same answer.

Moreover, the proposed letter states, "Relying on emergency response would not adequately protect individuals located on the river in the event of a rapidly developing accident such as a spray release." The words "would not adequately protect individuals ..." sounds like we are asserting a failure to assure the "adequate protection of the public health and safety." If the public will not be adequately protected, then we should make that case, and further, the proposed letter is not the proper way to make it by our statute.

Sean Sullivan
